

# Okiwi Passion Fruit Tree Catalogue 2016

## Introduction

In this catalogue you will find a wide choice of trees and plants selected for their natural disease resistance and/or their low chilling requirements, as well as excellent flavour, to give you the best possible chance of growing trees that will produce well for you on Great Barrier Island. However if you want any other tree varieties, ask and we will do our best to supply you with them.

We planted our first mixed pip and stone fruit orchard here in 2011 and many of those trees are now bearing. We have asterisked those that we have planted and had fruit from, and added our personal observations and comments in italics in the description.

*The nurseries from which we order our trees sell out of popular varieties earlier and earlier in the season as the years go by! PLEASE order ASAP to ensure you get what you want.*

### When will the trees arrive?

*Plants will arrive on GBI in two stages:*

*Bagged or potted trees and plants will arrive sometime in May or June.*

*Bare-rooted trees will arrive in July or August (while they are dormant).*

*The catalogue lists which trees are bare rooted/potted.*

*There will be a \$10 delivery charge to have the trees delivered to you. The delivery charge will apply to each delivery, i.e. potted plants (May/June delivery) vs bare-rooted (July/August delivery). Alternatively you may collect them yourself from Okiwi Passion.*

**Bare rooted** trees will have their roots kept damp in sacks of bamboo leaves and/sawdust. We can keep trees as bare root for 2-3 weeks if you happen to be away. Any longer, we can pot them at a cost of \$10 per tree.
